

Program

The Landscape Design Study Program is sponsored by the National Garden Clubs, Inc., coordinated by California Garden Clubs and hosted by the Calaveras County Garden Club, (a member of California Garden Clubs, Inc). This is the third of four sequenced courses offered every 6 months over a two-year period. A written exam is given after each of the four courses for those who wish to become NGC accredited landscape design consultants. Students successfully completing the series will become accredited landscape design consultants. One may enroll in any of the courses offered throughout the state or country.

The objectives of the Landscape Design Study Program are:

- Develop a greater sense of appreciation, pride and knowledge about our private and public gardens.
- Become better educated to make changes in our surroundings so that they will be more beautiful, useful, convenient, ecologically sound and easily maintained.
- Stimulate interest in all phases of landscape design, including community planning, that will affect all of our lives.
- Develop a contingent of qualified Landscape Design Consultants to serve in such decision-making areas of public life as providing leadership, educational programs, scholarships, awards and promoting better landscape design.
